PROFESSIONAL EXPERIENCE

DEVELOPER SUPPORT ENGINEER
Auth0 by OKTA
02/2025 – 10/2025 | Remote
Helping fellow developers integrate the Auth0 product into their apps : Designed and developed custom database connection scripts, actions, and forms to extend platform functionality and create a more intuitive user experience. Configured and debugged authentication flows using protocols like SAML, OIDC, and OAuth, making sure integrations were both secure and efficient. Built and tested feature showcases tailored to real-world scenarios, helping teams better understand and leverage the platform's full potential. Diagnosed and resolved tricky deployment problems, leading to smoother rollouts and a higher success rate across the board. As part of this role i used technologies such as : Node.js , Next.js , React , React Native , GIT , Salesforce , Jira , Confluence , DataDog , Okta FGA , Auth0 specific software .

JAVA FULL-STACK DEVELOPER
RAIFFEISEN BANK International
04/2023 – 02/2025 | Remote
Fullstack Development of Microservices and UIs with Java Springboot / Angular / SQL using Agile Methodologies . Also used the following technologies as part of the stack: GIT for version control , PostgreSQL databases , Liquibase for DB management , Jenkins for automation , Jira and Confluence for task overview and documentation and Swagger / Postman for endpoint testing .

FULL-STACK SOFTWARE DEVELOPER INTERNSHIP
Chamber of Deputies of Romania , Parliament of Romania
06/2022 – 09/2022 | Remote
During my time as a fullstack developer intern, I managed to build dynamic user interfaces with React, create APIs and manage backend logic using Node.js
